Description (100 words):

Effective August 20, 2009 B&W Tek, Inc. has reduced the price of its SDK (Software Development Kit) packages by 60%. Our SDK provides the user with the detailed Function Calls for our .DLL files. This package is designed for customers who wish to create their own custom software interface allowing complete control over their spectrometer or system. The SDK package comes complete with simple programming examples using various spectrometers models to help you get up and running. The SDK is compatible with C#, C++ Builder 6, Visual C++ 6.0, Visual Basic 6.0, VBA, Labview, VB.NET.
